

EdU LibMap In-door Positioning App

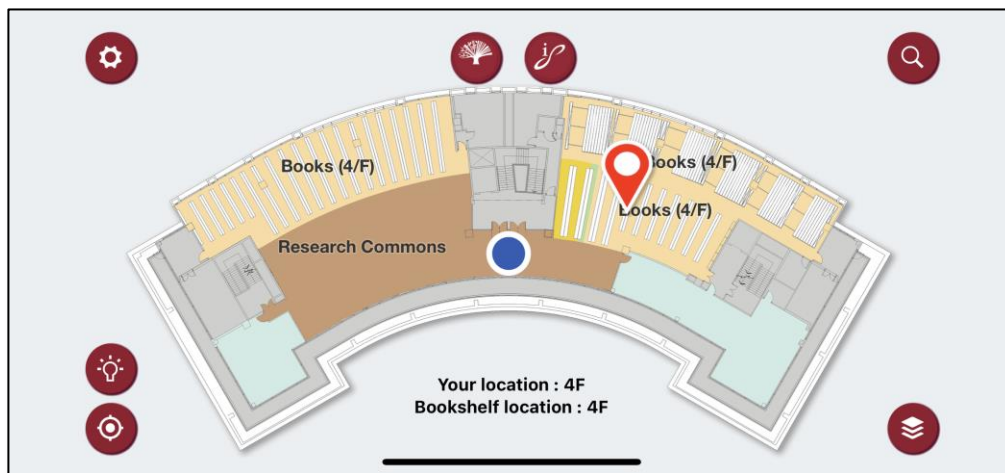

EdU LibMap 室內定位程式

The Library is pleased to present its in-door positioning app **EdU LibMap** for use within Mong Man Wai Library. EdUHK Library users can now download EdU LibMap directly from App Store or Google Play. Once installed on their iOS or Android mobile devices (e.g. mobile phones or tablets) with Bluetooth function turned on, when our users search EdUHK Library collections and select to “locate” a particular item on the browser of their mobile devices, they will be prompted to launch EdU LibMap which will display the exact shelving location of that item on a detailed MMW Library floor map. EdU LibMap can also display the current locations of the users if they are physically inside MMW Library.

EdU LibMap operates with Beacon technology which is a Proximity System based on Bluetooth Low Energy (BLE). Over 200 beacons have been installed on all floors of MMW Library to transmit positioning signals and to detect locations of individual users holding Bluetooth enabled mobile devices. For further details, please visit <http://libguides.eduhk.hk/libmap>, or contact our Information Counter at 2948 6653 / libinfo@eduhk.hk.

蒙民偉圖書館室內定位應用程式 **EdU LibMap** 已經可以從 App Store 或 Google Play 下載。教大圖書館讀者在其 iOS 或 Android 移動裝置 (例如手機或平板) 安裝 EdU LibMap 並開啟藍牙訊號及位置功能後，當他們在移動裝置的瀏覽器上檢索本館館藏及選看 (locate) 某一項目的位置時可以即時連接 EdU LibMap，以顯示該項目所處書架以及自己身處蒙民偉圖書館的詳細位置。

EdU LibMap 採用信標 (Beacon) 技術，是一種以低功耗藍牙無線通訊技術 (Bluetooth Low Energy BLE) 為基礎的鄰近感應系統 (Proximity System)。我們已經在蒙民偉圖書館內安裝了二百多個藍牙信標，發放定位訊號及實時感測手持藍牙裝置讀者的位置。有關詳情，請瀏覽 <http://libguides.eduhk.hk/libmap>，或請致電 2948-6653 / 電郵 libinfo@eduhk.hk，聯絡圖書館諮詢服務台。

iOS (App Store)	Android (Google Play)
